Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The amendment filed June 8, 2007 and the remarks presented therewith have been carefully considered. However, they are not deemed to be fully persuasive.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 3 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Willis, Jr. (2,805,898).

Willis, Jr. shows a manipulator for fragile objects comprising first (16) and second (18) contacts portions each having a plurality of openings (20) and fluid control means (42,44,46,48) for controlling the flow of positive air through openings (20) to push the objects in a forward direction.

Regarding claim 2, depending on the shape of the object being manipulated (e.g. an L-shaped object), a moment or “couple force” would inherently be generated by air flowing through opposing on portions (16,18).

3. Claim 24 is rejected under 35 U.S.C. 102(b) as being anticipated by Kuwaki et al. (5,125,706).

The patent to Kuwaki et al. shows a manipulator comprising opposing contact portions having openings (2,3) through which fluid can be drawn to grip an object on the

left and right sides, respectively, of the object's center of gravity. The opposing contact portions of the Kuwaki et al. device would inherently generate a couple force about any object's center of gravity that was not located exactly along the geometric central longitudinal axis of the object.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Danler et al. and Torvinen show manipulators having opposing sides with openings through which positive air flows.
5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
